

Table of Contents

1 SUMMARY

2 INTRODUCTION

3 REGIONAL GEOLOGY

- 3.1 Brazil - West Africa Comparisons
- 3.2 Tectono-stratigraphic Mega-sequences
- 3.3 Bathymetry
- 3.4 Coastal Geology and Offshore Petroleum Basins
- 3.5 Gravity and Magnetic Data

4 GEOLOGY AND EXPLORATION - ESPÍRITO SANTO, CAMPOS AND SANTOS BASINS

- 4.1 *Espírito Santo Basin*
 - 4.1.1 Structural Overview
 - 4.1.2 Stratigraphic Succession
 - 4.1.3 Volcanism
 - 4.1.4 Petroleum Systems
 - 4.1.5 Exploration History
 - 4.1.6 Hydrocarbon Play Types
- 4.2 *Campos Basin*
 - 4.2.1 Structural Overview
 - 4.2.2 Stratigraphic Succession
 - 4.2.3 Petroleum Systems
 - 4.2.4 Exploration History
 - 4.2.5 Hydrocarbon Play Types
- 4.3 *Santos Basin*
 - 4.3.1 Structural Overview
 - 4.3.2 Stratigraphic Succession
 - 4.3.3 Petroleum Systems
 - 4.3.4 Exploration History
 - 4.3.5 Hydrocarbon Play Types

5 SEISMIC DATA INTERPRETATION

- 5.1 *Database*
 - 5.1.1 Seismic Data
 - 5.1.2 Gravity and Magnetic data
 - 5.1.3 Well Data
- 5.2 *Interpretation Methodology*
 - 5.2.1 Project Setup
 - 5.2.2 Horizon and Isotime Maps
 - 5.2.3 Time-Depth Conversion

- 5.3 *Horizon and Interval Seismic Character*
 - 5.3.1 Intra-Oligocene Marker (Blue Marker) - Approximately 30 Ma
 - 5.3.2 Near Top Cretaceous - Approximately 70 Ma
 - 5.3.3 Near Top Albian - Approximately 90 Ma
 - 5.3.4 Top / Base Salt - Approximately 113/115-120 Ma
 - 5.3.5 Top Basement (base of Syn-rift sediments approximately 130-140 Ma)
- 5.4 *Seismic Interpretation Observations*
 - 5.4.1 *Espírito Santo Basin*
 - 5.4.1.1 Summary
 - 5.4.1.2 Seismic Interpretation Observations - Central Espírito Santo Basin
 - 5.4.1.3 Seismic Interpretation Observations - Southern Espírito Santo Basin
 - 5.4.2 *Campos Basin*
 - 5.4.2.1 Summary
 - 5.4.2.2 Seismic Interpretation Observations - Northern Campos Basin
 - 5.4.2.3 Seismic Interpretation Observations - Central Campos Basin
 - 5.4.2.4 Seismic Interpretation Observations - Southern Campos Basin
 - 5.4.3 *Santos Basin*
 - 5.4.3.1 Summary
 - 5.4.3.2 Seismic Interpretation Observations - Northern Santos Basin
 - 5.4.3.3 Seismic Interpretation Observations - Central Santos Basin
 - 5.4.3.4 Seismic Interpretation Observations - Southern Santos Basin

6 PETROLEUM EXPLORATION AND PRODUCTION

- 6.1 *Exploration and Production Areas*
 - 6.1.1 Campos Production and Reserves
 - 6.1.2 Main Offshore Oil Fields
 - 6.1.3 Main Offshore Gas Fields
 - 6.1.4 Field Development Programs
 - 6.1.5 Oil Fields - Seismic Data Examples
- 6.2 *Bid Rounds and ANP Definitions*
 - 6.2.1 Partnership Blocks - "Round Zero"
 - 6.2.2 First Bid Round
 - 6.2.3 Second Bid Round
 - 6.2.4 Third Bid Round
 - 6.2.5 Fourth Bid Round
 - 6.2.6 Fifth Bid Round
 - 6.2.7 Sixth Bid Round

7 BIBLIOGRAPHY

APPENDIX I - BRAZIL 99/2000 NON-EXCLUSIVE SURVEY: SEISMIC DATA ACQUISITION

- A-I.1 Brazil 99 - 2D multiclient survey map
- A-I.2 Brazil 99 Seismic Survey Parameters
 - A-I.2.1 Streamer Parameters
 - A-I.2.2 Recording Parameters
 - A-I.2.3 Source Parameters
 - A-I.2.4 Navigation Parameters
 - A-I.2.5 Onboard Data Processing Parameters

APPENDIX II - BRAZIL 99/2000: SEISMIC DATA PROCESSING PARAMETERS

- A-II.1 Processing Flow Diagram - PSTM
- A-II.2 Seismic Data Analyses
 - A-II.2.1 PSDM Processing - 2D Pre-Stack Depth Migration
 - A-II.2.2 AVO Analysis

LIST OF FIGURES

Cover: Top Salt surface, covering Santos, Campos and Espírito Santo Basins, displayed in 3D

2 Introduction

- 2.1 Comparison of Brazilian and African Offshore Basins
- 2.2 Seismic Basemap, Exploration Concessions and 4th Round Blocks - Offshore SE Brazil
- 2.3 Seismic Basemap, Exploration Concessions and 4th Round Blocks - Offshore Central Brazil
- 2.4 Seismic Basemap, Exploration Concessions and 4th Round Blocks - Offshore NE Brazil
- 2.5 Graph of Historical 2D Offshore Seismic Data Acquisition Activity (line km)

3 Regional Geology

- 3.1 Relief Map of Atlantic Ocean
- 3.2 Pre-rift Configuration of African and South American Continents
- 3.3 Three Phases of South Atlantic Rifting
- 3.4 Offshore Brazil Physiography
- 3.5 Tectonic Summary - Southeast Brazil
- 3.6* Magnetic Anomalies, Reduced to Pole - Southeast Offshore Brazil
- 3.7* Free Air Gravity Anomalies - Southeast Offshore Brazil
- 3.8* Residual Bouguer Gravity Anomalies - Southeast Offshore Brazil

* Gravity and magnetic data acquisition, processing and interpretation provided by Austin Exploration and Ark Geophysics.

4 Geology and Exploration - Espírito Santo, Campos and Santos Basins

- 4.1 Dip-oriented Geologic Cross Section - Espírito Santo Basin
- 4.2 Stratigraphic Chart - Espírito Santo Basin
- 4.3 Example Well Log with Stratigraphy - Espírito Santo Basin
- 4.4 Dip-oriented Geologic Cross Section - Campos Basin
- 4.5 Stratigraphic Chart - Campos Basin
- 4.6 Example Well Log with Stratigraphy - Campos Basin
- 4.7 Dip-oriented Pseudo-depth Converted Geo-seismic Cross Section - Northern Santos Basin
- 4.8 Dip-oriented Pseudo-depth Converted Geo-seismic Cross Section - Central Santos Basin
- 4.9 Dip-oriented Pseudo-depth Converted Geo-seismic Cross Section - Southern Santos Basin
- 4.10 Stratigraphic Chart - Santos Basin
- 4.11 Example Well Log with Stratigraphy - Santos Basin

5 Seismic Data Interpretation

- 5.1 Well Control
- 5.2 Stratigraphic Correlation of Interpreted Horizons
- 5.3 Regional map - TWT to Seabed
- 5.4 Regional map - TWT to Intra-Oligocene Marker (Blue Marker)
- 5.5 Regional map - TWT to Near Top Cretaceous Unconformity
- 5.6 Regional map - TWT to Near Top Albian Unconformity (Macaé equivalent)

- 5.7 Regional map - TWT to Top Salt
- 5.8 Regional map - TWT to Base Salt
- 5.9 Regional map - TWT to Basement
- 5.10 Regional map - Seabed to Top Salt Isotime
- 5.11 Regional map - Top Salt to Base Salt Isotime
- 5.12 Regional map - Base Salt to Basement Isotime
- 5.13 Time versus Depth Graph, Water Layer Removed - Offshore Southeast Brazil
- 5.14 Geologic Elements - Espírito Santo Basin
- 5.15 Interpreted Seismic Section - Northern Espírito Santo Basin
- 5.16 Interpreted Seismic Section - Southern Espírito Santo Basin
- 5.17 Geologic Elements - Campos Basin
- 5.18 Interpreted Seismic Section - Northern Campos Basin, Seismic Expression of Moho
- 5.19 Interpreted Seismic Section - Northern Campos Basin
- 5.20 Prestack Time Migrated Seismic Section - Campos Basin
- 5.21 Prestack Depth Migrated Seismic Section - Campos Basin
- 5.22 Interpreted Seismic Section - Central Campos Basin
- 5.23 Interpreted Seismic Section - Southern Campos Basin
- 5.24 Geologic Elements - Santos Basin
- 5.25 Interpreted Seismic Section - Northern Santos Basin
- 5.26 Interpreted Seismic Section - Cabo Frio Fault Zone, Central Santos Basin
- 5.27 Interpreted Seismic Section - Southern Santos Basin
- 5.28 Pre-stack Time Migrated Seismic Section - Santos Basin
- 5.29 Pre-stack Depth Migrated Seismic Section - Santos Basin
- 5.30 Interpreted Seismic Section - Continental-Oceanic Crustal Boundary, Rio Grande Fracture Zone, Santos Basin
- 5.31 Interpreted Seismic Section - Salt Overlying Oceanic Crust, Santos Basin
- 5.32 Interpreted Seismic Section - Volcanic Activity, Santos Basin
- 5.33 Interpreted Seismic Section - Seaward Dipping Reflectors, Santos Basin
- 5.34 Interpreted Seismic Section - Low Impedance Contrast Between Salt and Carbonate, Santos Basin
- 5.35 Seismic Example Figure Locations

6 Petroleum Exploration and Production

- 6.1 Campos Basin Production Facilities

Seismic Example over Fields and Discoveries - Espírito Santo Basin

- 6.2 Interpreted Seismic Section - Congoá Field - Lower Tertiary Turbidites
- 6.3 Interpreted Seismic Section - Block BES-2 Discovery

Deep-Water Play Types - Espírito Santo Basin

- 6.4 Interpreted Seismic Section- Play Types - Espírito Santo Basin Upper Cretaceous and Lower Tertiary Turbidites

Seismic Examples over Fields and Discoveries - Campos Basin

- 6.5 Interpreted Seismic Section - Badejo and Linguado Fields - Coquinas and Fractured Basalt
- 6.6 Interpreted Seismic Section - Pampo Field - Albian Carbonates and Syn-rift Coquinas
- 6.7 Interpreted Seismic Section - Garoupa Field - Albian Carbonates
- 6.8 Interpreted Seismic Section - Namorado Field - Cenomanian/Turonian Turbidites
- 6.9 Interpreted Seismic Section - Bonito Field - Oligocene (Gas)/Eocene Turbidites, and Albian Carbonates
- 6.10 Interpreted Seismic Section - Enchova Field - Eocene/Oligocene Turbidites
- 6.11 Interpreted Seismic Section - Carapeba Field - Santonian/Maastrichtian Turbidites
- 6.12 Cosine of Phase Attribute Seismic Section - Rôncador Field and Vicinity, Campos Basin
- 6.13 Interpreted Seismic Section - Rôncador and Frade Fields, Campos Basin
- 6.14 Interpreted Seismic Section - Rôncador Field - Santonian/Maastrichtian Turbidites
- 6.15 Interpreted Seismic Section - Albacora Field - Oligocene/Turonian Turbidites
- 6.16 Interpreted Seismic Section - Albacora Leste Field, Campos Basin
- 6.17 Interpreted Seismic Section - Albacora Leste Field - Miocene/Oligocene Turbidites
- 6.18 Interpreted Seismic Section - Vermelho Field - Eocene Turbidites
- 6.19 Interpreted Seismic Section - Marlim Leste Field, Campos Basin
- 6.20 Interpreted Seismic Section - Marlim Field - Oligocene Turbidites - Regional View
- 6.21 Interpreted Seismic Section - Caratinga Field - Eocene/Oligocene Turbidites
- 6.22 Interpreted Seismic Section - Barracuda Field - Eocene/Oligocene Turbidites
- 6.23 Interpreted Seismic Section - Espadarte Field
- 6.24 Interpreted Seismic Section - BC600 Discovery
- 6.25 Interpreted Seismic Section - BC-60 Discovery

Play Types - Campos Basin

- 6.26 Interpreted Seismic Section - Play Types - Campos Basin Deep-Water Turbidites with Amplitude Anomalies, 4th Round Block BC20
- 6.27 Interpreted Seismic Section - Play Types - Campos Basin Turbidites with Amplitude Anomalies, 4th Round Block BC24
- 6.28 Interpreted Seismic Section - Play Types - Campos Basin Deep-Water Turtle Structure with Amplitude Anomalies
- 6.29 Interpreted Seismic Section - Lead - Campos Basin Ultra-Deep-Water Basement Drape Structure with Amplitude Anomalies

Seismic Examples over Fields and Discoveries - Santos Basin

- 6.30 Interpreted Seismic Section - Block BS-500, 1-RJS 539 - Cretaceous Turbidites
- 6.31 Interpreted Seismic Section - Block BS-500, Second Discovery - Cretaceous Turbidites
- 6.32 Interpreted Seismic Section - Block BS-4, 1-Shell-4RJS - Oligocene Turbidites
- 6.33 Interpreted Seismic Section - Caravelas Field - Albian Carbonates
- 6.34 Interpreted Seismic Section - Estrêla do Mar Field - Albian Carbonates
- 6.35 Interpreted Seismic Section - Tubarão Field - Albian Carbonates
- 6.36 Interpreted Seismic Section - Merluza Field - Turonian Turbidites

Deep-Water Play Types - Santos Basin

- 6.37 Interpreted Seismic Section - Play Types - Santos Basin Deep-Water Turbidites
- 6.38 Interpreted Seismic Section - Play Types - Santos Basin Deep-Water Top Cretaceous Unconformity Pinchouts
- 6.39 Interpreted Seismic Section - Play Types - Santos Basin Channel Sands in Minibasins - Tertiary Turbidites
- 6.40 Interpreted Seismic Section - Play Types - Santos Basin Potential Carbonate Mounds on the São Paulo Plateau Flanks
- 6.41 Seismic Example Figure Locations

LIST OF TABLES

- 4.1 Espírito Santo Basin Distribution of Offshore Reservoirs
- 4.2 Campos Basin Distribution of Reservoirs
- 4.3 Santos Basin Distribution of Reservoirs
- 5.1 Wells Utilized in the Interpretation Project
- 6.1 Major Oil Fields - Geological Setting and Production (water depths < 400 meters)
- 6.2 Major Deep-Water Oil Fields - Geological Setting and Production (water depths ranging from 400 to 1,000 meters)
- 6.3 Major Ultra-Deep-Water Oil Fields - Geological Setting and Production (water depths > 1,000 meters)
- 6.4 Major Offshore Gas Fields - Geological Setting and Production (recoverable reserves > 100 BCF)
- 6.5 Seismic Responses of Fields and Discoveries
- 6.6 Round Zero Petrobras Partnerships
- 6.7 June 1999 First Round Highest Bids
- 6.8 June 2000 Second Bid Round Highest Bids - Offshore Blocks
- 6.9 June 2001 Third Bid Round Highest Bids - Offshore Blocks
- 6.10 June 2002 Fourth Bid Round Highest Bids - Offshore Blocks
- 6.11 August 2003 Fifth Bid Round Highest Bids - Offshore Blocks
- 6.12 August 2004 Sixth Bid Round Highest Bids - Offshore Blocks
