

# 20K EVO BOP

Introducing the next evolution in drilling systems, Cameron's new 20,000 psi WP EVO™ BOP, the world's first 18 3/4" HP drilling BOP, is designed to meet the challenges of high pressure and high-temperature applications.

## Features and Benefits

### Hydraulic gear motor locking system, EVO-Loc™

- Reduced complexity, increased reliability
- Capable of ROV intervention

### Dual, low-profile operating pistons

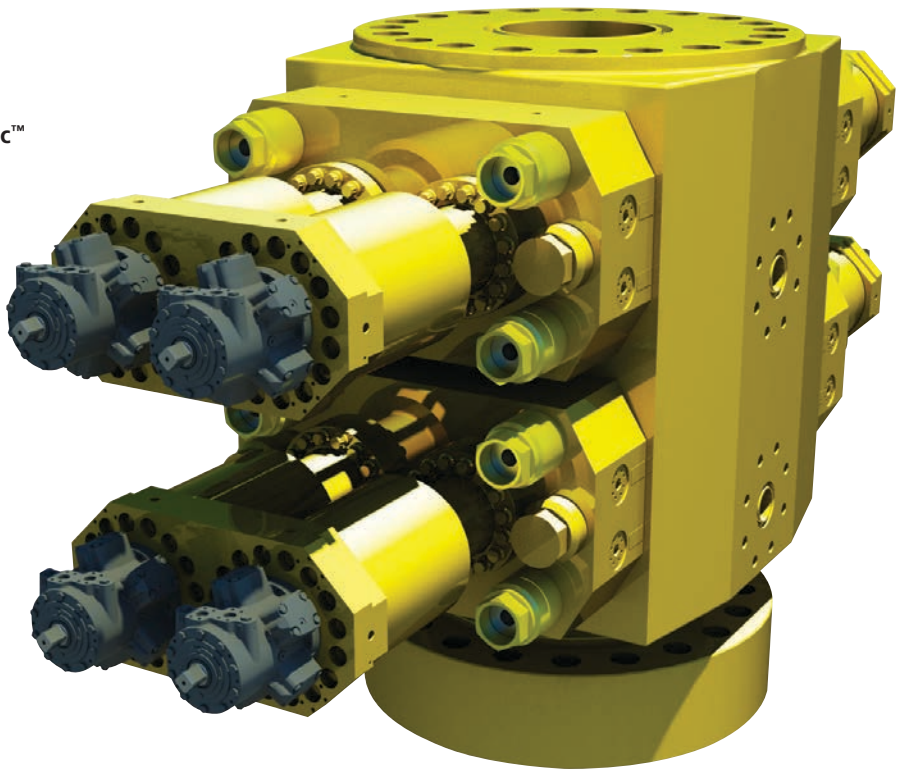

- At 5000-psi operating pressure, the pistons realize an output of 970,000 lb
- Reduce the necessity for tandem boosters

### Fluid saving operating system

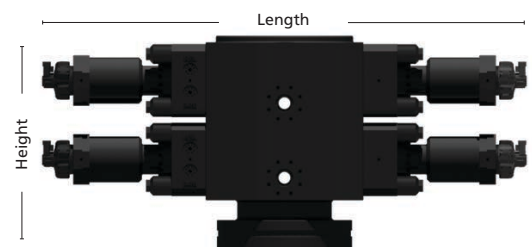

- Significant reduction of accumulator bottles required to function the BOP

### Evolutionary ram change design

- Ram change function is eliminated from hydraulic operating system
- Potential leak paths reduced
- Increased reliability and reduced maintenance

	18 3/4" 15K TL BOP (w/ ST-Locks)	18 3/4" 15K EVO BOP	18 3/4" 20K EVO BOP
Weight	72,300 lb	58,200 lb	79,200 lb
Height	83.2"	72.5"	85.5"
Length	173.5"	182.5"	176.5"
Fluid to open	23.4 gal	8 gal	
Fluid to close	24.6 gal	20 gal	
Closing ratio	6.7:1	10.1:1
